Contents for Volume 132

Number 1, 7 May 1988

KARLOVSKY, P., Mutual Competitive Inhibition Between Target Sites During the Restriction Endonuclease Digestion of DNA 1

KARLOVSKY, P., Calculation of Individual Cleavage Rates from Partial Digests in Restriction Endonuclease Kinetics 7

BOYETT, M. R. and FEDIDA, D., A Computer Simulation of the Effect of Heart Rate on Ion Concentrations in the Heart 15

PEPER, A., GRIMBERGEN, C. A., KRAAL, J. W. and ENGELBART, J. H., An Approach to the Modeling of the Tolerance Mechanism in the Drug Effect. II: On the Implications of Compensatory Regulation . . 29

SHINE, R. and GUILLETTE, L. J., Jr., The Evolution of Viviparity in Reptiles: A Physiological Model and its Ecological Consequences . . . 43

VARÓN, R., CÁNOVAS, F. G., CARMONA, F. G., TUDELA, J., ROMÁN, A. and VAZQUEZ, A., Kinetics of a Model for Zymogen Activation: The Case of High Activating Enzyme Concentrations 51

REGEN, D. M., Independent Determinants of Systolic Effectiveness: Growth Ability, Contractility and Mobility 61

MOREL, J. E. and BACHOUCHI, N., Muscle Contraction and Movement of Cellular Organelles: Are There Two Different Types of Mechanisms for their Generation? 83

MELÉNDEZ-HEVIA, E. and TORRES, N. V., Economy of Design in Metabolic Pathways: Further Remarks on the Game of the Pentose Phosphate Cycle 97

PARKER, R., WALDREN, C., HEI, T. K., WONG, D. F. and PUCK, T. L., Analysis of Mutant Frequency Curves and Survival Curves Applied to the A_L Hybrid Cell System 113

LETTERS TO THE EDITOR

ŁOMNICKI, A. and SEDZIWY, S., Resource Partitioning and Population Stability Under Exploitation Competition 119

SHCHERBAK, V. I., The Co-operative Symmetry of the Genetic Code . 121

LOUIE, A. H. and RICHARDSON, I. W., The Metric Structure of Irreversible Thermodynamics 125

Number 2, 21 May 1988

LIMA, S. L., Vigilance and Diet Selection: The Classical Diet Model Reconsidered 127

LIBERTINI, G., An Adaptive Theory of the Increasing Mortality with Increasing Chronological Age in Populations in the Wild 145

MONTGOMERY, J. C., Temperature Compensation in the Vestibulo-Ocular Reflex: A Novel Hypothesis of Cerebellar Function 163

FRÖMMEL, C., Use of the Averaged Mutation Rate in Pieces of Protein Sequences to Predict the Location of Antigenic Determinants . . 171

GOLDWASSER, L., Branching Patterns, Generating Rules, and Astogenetic Trajectories in Arborescent Bryozoans 179

LINDERMAN, J. J. and LAUFFENBURGER, D. A., Analysis of Intracellular Receptor/Ligand Sorting in Endosomes 203

LETTER TO THE EDITOR

EDMONDS, D. E. and ROSE, M. R., Reproductive Wastage and the Evolution of Genetic Systems 247

ANNOUNCEMENT 251

Number 3, 7 June 1988

MINI REVIEW

HOLLIDAY, R., Successes and Limitations of Molecular Biology . 253

BECK, J. S., On Internalization of Hormone-Receptor Complex and Receptor Recycling 263

NAGORCKA, B. N., A Pattern Formation Mechanism to Control Spatial Organization in the Embryo of *Drosophila melanogaster* . . . 277

SINHA, S. and RAMASWAMY, R., Complex Behaviour of the Repressible Operon 307

COWAN, R. and UNDERWOOD, P. A., Steric Effects in Antibody Reactions with Polyvalent Antigen 319

BOYD, R. and RICHERSON, P. J., The Evolution of Reciprocity in Sizable Groups 337

BEAUCHAMP, G. and LEFEBVRE, L., Food Finding in Colonially Nesting Birds 357

LETTERS TO THE EDITOR

TUSZYŃSKI, J. A., On Possible Mechanisms of Rouleau Formation in Human Erythrocytes 369

VICKERY, W. L., Reply to Maynard Smith 375

ERRATUM 379

Number 4, 21 June 1988

HSU, J.-P., Biodigestion of Solid Substrate: Effect of Random Initial Condition 381

VICKERS, G. T. and CANNINGS, C., Patterns of ESS's I 387

CANNINGS, C. and VICKERS, G. T., Patterns of ESS's II 409

POWELL, G. E., Structural Instability of the Theory of Simple Competition . 421

ABUGOV, R., A Sex-specific Quantitative Genetic Theory for Life History and Development 437

CHAY, T. R., Kinetic Modeling for the Channel Gating Process from Single Channel Patch Clamp Data 449

SCHAFFER, M. E., Evolutionarily Stable Strategies for a Finite Population and a Variable Contest Size 469

BODNAR, J. W., A Domain Model for Eukaryotic DNA Organization: A Molecular Basis for Cell Differentiation and Chromosome Evolution 479

LETTER TO THE EDITOR

PECZKIS, J., Predicting Body-weight Distribution of Mammalian Genera in Families and Orders 509

A_L, hybrid cell system, analysis of mutant frequency curves and survival curves applied to, 113
ABUGOV, R., A sex-specific quantitative genetic theory for life history and development, 437
Adaptive theory of the increasing mortality with increasing chronological age in populations in the wild, 145
Age, chronological, increasing, and increasing mortality, in populations in the wild, an adaptive theory of, 145
Antibody reactions with polyvalent antigen, steric effects in, 319
Antigen, polyvalent, steric effects in antibody reactions with, 319
Antigenic determinants, use of the averaged mutation rate in pieces of protein sequences to predict the location of, 171
Astogenetic trajectories, branching patterns, generating rules, and, in arborescent bryozoans, 179

BACHOUCHI, N. (see MOREL, J. E.), 83
BEAUCHAMP, G. and LEFEBVRE, L., Food finding in colonially nesting birds, 357
BECK, J. S., On internalization of hormone-receptor complex and receptor recycling, 263
Biodigestion of solid substrate; effect of random initial condition, 381
Birds, colonially nesting, food finding in, 357
BODNAR, J. W., A domain model for eukaryotic DNA organization: a molecular basis for cell differentiation and chromosome evolution, 479
Body-weight distribution of mammalian genera in families and orders, prediction of (letter), 509
BOYD, R. and RICHERSON, P. J., The evolution of reciprocity in sizable groups, 337
BOYETT, M. R. and FEDIDA, D., A computer simulation of the effect of heart rate on ion concentrations in the heart, 15
Branching patterns, generating rules, and astogenetic trajectories in arborescent bryozoans, 179
Bryozoans, arborescent, branching patterns, generating rules, and astogenetic trajectories in, 179

CANNINGS, C. (see VICKERS, G. T.), 387
CANNINGS, C. and VICKERS, G. T., Patterns of ESS's II, 409
CÁNOVAS, F. G. (see VARÓN, R.), 51
CARMONA, F. G. (see VARØN, R.), 51
Cell differentiation, a molecular basis for; a domain model for eukaryotic DNA organization, 479
Cell system, hybrid, A_L, analysis of mutant frequency curves and survival curves applied to, 113
Cellular organelles, muscle contraction and movement of; are there two different types of mechanisms for their generation?, 83
Cerebellar function, a novel hypothesis; temperature compensation in the vestibulo-ocular reflex, 163
Channel gating process, kinetic modeling from single channel patch clamp data, 449
CHAY, T. R., Kinetic modeling for the channel gating process from single channel patch clamp data, 449
Chromosome evolution, a molecular basis for; a domain model for eukaryotic DNA organization, 479

Cleavage rates, individual, calculation of, from partial digests in restriction endonuclease kinetics, 7
Colonially nesting birds, food finding in, 357
Competition, exploitation, population stability and resource partitioning under (letter), 119
Competition, simple, structural instability of the theory of, 421
Competitive inhibition, mutual, between target sites during the restriction endonuclease digestion of DNA, 1
Computer simulation of the effect of heart rate on ion concentration in the heart, 15
Contest size, variable, evolutionarily stable strategies for a finite population and, 469
Contractility, growth ability and mobility; independent determinants of systolic effectiveness, 61
Co-operative symmetry of the genetic code (letter), 121
COWAN, R. and UNDERWOOD, P. A., Steric effects in antibody reactions with polyvalent antigen, 319

Design economy in metabolic pathways: further remarks on the game of the pentose phosphate cycle, 97
Diet selection, and vigilence; the classical diet model reconsidered, 127
DNA, eukaryotic, organization, a domain model; a molecular basis for cell differentiation and chromosome evolution, 479
DNA, mutual competitive inhibition between target sites during the restriction endonuclease digestion of, 1
Domain model for eukaryotic DNA organization; a molecular basis for cell differentiation and chromosome evolution, 479
Drosophila melanogaster embryo, a pattern formation mechanism to control spatial organization in, 277
Drug effect, approach to the modeling of the tolerance mechanism in; the implications of compensatory regulation, 29

Ecological consequences of a physiological model of the evolution of viviparity in reptiles, 43
Economy of design in metabolic pathways: further remarks on the game of the pentose phosphate cycle, 97
EDMONDS, D. E. and ROSE, M. R., Reproductive wastage and the evolution of genetic systems (letter), 247
Embryo of *Drosophila melanogaster*, a patter formation mechanism to control spatial organization in, 277
Edosomes, analysis of intracellular receptor/ligand sorting in, 203
ENGLEBART, J. H. (see PEPER, A.), 29
Erythrocytes, human, possible mechanisms of rouleau formation in (letter), 369
ESS's, patterns of, 387, 409
Eukaryotic DNA organization, a domain model; a molecular basis for cell differentiation and chromosome evolution, 479
Evolution, chromosome, a molecular basis for; a domain model for eukaryotic DNA organization, 479
Evolution of genetic systems, and reproductive wastage (letter), 247
Evolution of reciprocity in sizable groups, 337
Evolution of viviparity in reptiles; a physiological model and its ecological consequences, 43
Evolutionarily stable strategies for a finite population and a variable contest size, 469

Families and orders, predicting body-weight distribution of mammalian genera in (letter), 509
FEDIDA, D. (see BOYETT, M. R.), 15
Food finding in colonially nesting birds, 357
FRÖMMEL, C., Use of the averaged mutation rate in pieces of protein sequences to predict the location of antigenic determinants, 171

Genera, mammalian, in families and orders, predicting body-weight distribution of (letter), 509
Genetic code, the co-operative symmetry of (letters), 121
Genetic systems, evolution of, and reproductive wastage (letter), 247
Genetic theory, quantitative, sex-specific, for life history and development, 437
GOLDWASSER, L., Branching patterns, generating rules, and astogenetic trajectories in arborescent bryozoans, 179
GRIMBERGEN, C. A. (see PEPER, A.), 29
Groups, sizable, the evolution of reciprocity in, 337
Growth ability, contractility and mobility; independent determinants of systolic effectiveness, 61
GUILETTE, L. J., JR. (see SHINE, R.), 43

Heart rate, effect on ion concentrations in the heart, a computer simulation, 15
HEI, T. K. (see PARKER, R.), 113
HOLLIDAY, R., Successes and limitations of molecular biology, 253
Hormone-receptor complex and receptor recycling, on internalization of, 263
HSU, J.-P., Biodigestion of solid substrate: effect of random initial condition, 381
Human erythrocytes, possible mechanisms of rouleau formation in (letter), 369

Intracellular receptor/ligand sorting in endosomes, 203
Ion concentrations in the heart, a computer simulation of the effect of heart rate on, 15

KARLOVSKY, P., Calculation of individual cleavage rates from partial digests in restriction endonuclease kinetics, 7
KARLOVSKY, P., Mutual competitive inhibition between target sites during the restriction endonuclease digestion of DNA, 1
Kinetic modeling for the channel gating process from single channel patch clamp data, 449
Kinetics of a model for zymogen activation; the case of high activating enzyme concentrations, 51
Kinetics, restriction endonuclease, calculation of individual cleavage rates from partial digests in, 7
KRAAL, J. W. (see PEPER, A.), 29

LAUFFENBURGER, D. A. (see LINDERMAN, J. J.), 203
LEFEBVRE, L. (see BEAUCHAMP, G.), 357
LIBERTINI, G., An adaptive theory of the increasing mortality with increasing chronological age in populations in the wild, 145
Life history and development, a sex-specific quantitative genetic theory for, 437
LIMA, S. L., Vigilance and diet selection: the classical diet model reconsidered, 127
LINDERMAN, J. J. and LAUFFENBURGER, D. A., Analysis of intracellular receptor/ligand sortring in endosomes, 203
LOMNICKI, A. and SEDZIWY, S., Resource partitioning and population stability under exploitation competition (letter), 119
LOUIE, A. H. and RICHARDSON, I. W., The metric structure of irreversible thermodynamics (letter), 125

Mammalian genera in families and orders, predicting body-weight distribution of (letter), 509
Maynard Smith, reply to (letter), 375
MELÉNDEZ-HEVIA, E. and TORRES, N. V., Economy of design in metabolic pathways: further remarks on the game of the pentose phosphate cycle, 97
Metabolic pathways, economy of design in; further remarks on the game of the pentose phosphate cycle, 97
Metric structure of irreversible thermodynamics (letter), 125

Mobility, growth ability and contractility; independent determinants of systolic effectiveness, 61
Molecular basis for cell differentiation and chromosome evolution; a domain model for eukaryotic DNA organization, 479
Molecular biology, successes and limitations of, 253
MONTGOMERY, J. C., Temperature compensation in the vestibulo-ocular reflex: a novel hypothesis of cerebellar function, 163
MOREL, J. E. and BACHOUCHI, N., Muscle contraction and movement of cellular organelles: are there two different types of mechanisms for their generation?, 83
Mortality, increasing, with increasing chronological age, in populations in the wild, an adaptive theory of, 145
Movement of cellular organelles, and muscle contraction; are there two different types of mechanisms for their generation?, 83
Muscle contraction and movement of cellular organelles: are there two different types of mechanisms for their generation? 83
Mutant frequency curves and survival curves applied to the A_L hybrid cell system, analysis of, 113
Mutation rate, averaged, in pieces of protein sequences, use to predict the location of antigenic determinants, 171

NAGORCKA, B. N., A pattern formation mechanism to control spatial organization in the embryo of *Drosophila melanogaster*, 277

Operon, repressible, complex behaviour of, 307
Orders, predicting body-weight distribution of mammalian genera in families and (letter), 509
Organelles, cellular, muscle contraction and movement of; are there two different types of mechanisms for their generation?, 83
Organization, DNA, eukaryotic, a domain model; a molecular basis for cell differentiation and chromosome evolution, 479
Organization, spatial, in the embryo of *Drosophila melanogaster*, a pattern formation mechanism to control, 277

PARKER, R., WALDREN, C., HEI, T. K., WONG, D. F. and PUCK, T. L., Analaysis of mutant frequency curves and survival curves applied to the A_L hybrid cell system, 113
Pathways, metabolic, economy of design in; further remarks on the game of the pentose phosphate cycle, 97
Pattern formation mechanism to control spatial organization in the embryo of *Drosophila melanogaster*, 277
Patterns, branching, generating rules, and astogenetic trajectories in arborescent bryozoans, 179
Patterns of ESS's, 387, 409
PECZKIS, J., Predicting body-weight distribution of mammalian genera in families and orders (letter), 509
Pentose phosphate cycle, further remarks on the game of; economy of design in metabolic pathways, 97
PEPER, A., GRIMBERGEN, C. A., KRAAL, J. W. and ENGELBART, J. H. An approach to the modeling of the tolerance mechanism in the drug effect. II. On the implications of compensatory regulation, 29
Physiological model of the evolution of viviparity in reptiles, 43
Population, finite, and a variable contest size, evolutionarily stable strategies for, 469
Population stability and resource partitioning under exploitation competition (letter), 119
Populations in the wild, and adaptive theory of the increasing mortality with increasing chronological age in, 145

POWELL, G. E., Structural instability of the theory of simple competition, 421
Protein sequences, use of the averaged mutation rate in pieces of, to predict the location of antigenic determinants, 171
PUCK, T. L. (see PARKER, R.), 113

RAMASWAMY, R. (see SINHA, S.), 307
Receptor recycling, on internalization of hormone-receptor complex and, 263
Receptor/ligand sorting, intracellular, in endosomes, analysis of, 203
Reciprocity in sizable groups, the evolution of, 337
REGEN, D. M., Independent determinants of systolic effectiveness: growth ability, contractility and mobility, 61
Regulation, compensatory, the implications of; approach to the modeling of the tolerance mechanism in the drug effect, 29
Repressible operon, complex behaviour of, 307
Reproductive wastage and the evolution of genetic systems (letter), 247
Reptiles, the evolution of viviparity in; a physiological model and its ecological consequences, 43
Resource partitioning and population stability under exploitation competition (letter), 119
Restriction endonuclease digestion of DNA, mutual competitive inhibition between target sites during, 1
Restriction endonuclease kinetics, calculation of individual cleavage rates from partial digests in, 7
RICHARDSON, I. W. (see LOUIE, A. H.), 125
RICHERSON, P. J. (see BOYD, R.), 337
ROMÁN, A. (see VARÓN, R.), 51
ROSE, M. R. (see EDMONDS, D. E.), 247
Rouleau formation in human erythrocytes, on possible mechanisms of (letter), 369

SCHAFFER, M. E., Evolutionarily stable strategies for a finite population and a variable contest size, 469
SEDZIWY, S. (see LOMNICKI, A.), 119
Sequences, protein, use of the averaged mutation rate in pieces of, to predict the location of antigenic determinants, 171
Sex-specific quantitative genetic theory for life history and development, 437
SHCHERBAK, V. I., The co-operative symmetry of the genetic code (letter), 121
SHINE, R. and GUILLETTE, L. J., JR., The evolution of viviparity in reptiles: a physiological model and its ecological consequences, 43
SINHA, S. and RAMASWAMY, R., Complex behaviour of the repressible operon, 307
Spatial organization in the embryo of *Drosophila melanogaster*, a pattern formation mechanism to control, 277
Stability, population, and resource partitioning under exploitation competition (letter), 119
Steric effects in antibody reactions with polyvalent antigen, 319
Structural instability of the theory of simple competition, 421
Structure, metric, of irreversible thermodynamics (letter), 125
Substrate, solid, biodigestion of; effect of random iniitial condition, 381
Symmetry, co-operative, of the genetic code (letter), 121
Systolic effectiveness, independent determinants of; growth ability, contractility and mobility, 61

Target sites, mutual competitive inhibition between, during the restriction endonuclease digestion of DNA, 1
Temperature compensation in the vestibulo-ocular reflex: a novel hypothesis of cerebellar function, 163
Thermodynamics, irreversible, the metric structure of (letter), 125

Tolerance mechanism in the drug effect, approach to moedling of; the implications of compensatory regulation, 29
TORRES, N. V. (see MELÉNDEZ-HEVIA, E.), 97
TUDELA, J. (see VARÓN, R.), 51
